

AMENDMENTS TO THE ABSTRACT

Please replace the abstract with the substitute abstract as follows. The following substitute meets the requirement for a proper abstract.

A cover member for a push-button switch is disclosed, the cover member including a hard base and a keypad, wherein the hard base is made of a hard resin with a through hole for a key top, wherein the keypad is made of a silicone rubber film, and a front surface of the keypad is in contact with an entire back surface of the hard base, thereby preventing the entire back surface of the hard base from being contact with any member other than the keypad, and wherein the keypad is exposed through the through hole, and a back surface of the keypad corresponding to the through hole is provided with a press projection for pressing a contact point.
